Its elegance will fascinate you. Its agility inspire. And its presence impress you through and through. The BMW X6 represents the fusion of athletic coupé charisma with the authority and versatility of a Sport Activity Vehicle. Wherever you want to go, with the BMW X6 you can overcome every hurdle. Savour the freedom offered by a stylish refusal to compromise.

EXPERIENCE A COUPÉ LIKE NO OTHER.

Whether you're on your way to the concert or the office, or embarking on a journey of sporting exploration beyond the boundaries of everyday life, the enthralling combination of coupé and Sport Activity Vehicle creates an authoritative impression in any situation. Let the elegance of the BMW X6 run free – and enjoy the feeling of limitless driving pleasure.

FOR THE WORLD'S BOULEVARDS AND AVENUES.
AND ALL ROADS – WHERE EYES CAN'T FOLLOW YOU.

A FORM AGAINST THE NORM.

An unmistakable exterior. For an inimitable driving experience. You can see an innate desire to surge forward. But it's also something you can feel in the BMW X6. The virtually 50:50 axle load distribution, in particular, creates optimum conditions for outstanding driving dynamics and conjures up that incomparable feeling at the wheel of this car. The optional active chassis control system Adaptive Drive uses Servotronic to optimise steering forces during normal and dynamic driving. It also increases the stability of the BMW X6 by significantly minimising pitch and roll and adapting the chassis damping to variations in the road surface. And the optional Active Steering adapts the steering ratio to the car's speed – for greater precision and agility. The only thing that could lose its composure in the BMW X6 is likely to be your pulse.

**WHATEVER THE ROAD THROWS AT IT, THANKS TO xDRIVE,
THE BMW X6 REMAINS UNRUFFLED.**

Gravel, rain, snow – road conditions are constantly changing. Thanks to the intelligent four-wheel-drive system xDrive, the BMW X6 reacts to each and every change in fractions of a second – and you can rely on the outstanding driving characteristics of the BMW X6 in any situation. That's because this system identifies where drive is required and distributes it flexibly between the front and rear axles. The BMW X6, therefore, boasts optimum traction. And not only through corners. Even in the most adverse conditions, such as wet or slippery surfaces, you will enjoy unrestricted dynamics and agility along with increased stability and safety. In short, the BMW X6 proves with impressive style that it's at home on any road.

A NEW CHALLENGE TO THE TIGHTEST BENDS: DYNAMIC PERFORMANCE CONTROL.

The BMW X6 takes even the most demanding bends easily in its stride. In addition to the intelligent four-wheel-drive system xDrive, it premieres Dynamic Performance Control, a BMW innovation which noticeably boosts agility and facilitates higher speed when tackling bends. This control system distributes drive force to the rear axle seamlessly between the left and right wheels. For maximum dynamism and optimal stability, engine torque is strategically raised on the wheel on the outside of the bend, so the BMW X6 steers nimbly into the bend and holds the line precisely. With Dynamic Performance Control, the BMW X6 also reacts faster and more accurately to your steering input. And the end result – you enjoy unmatched driving pleasure on every track and any surface. This Sport Activity Coupé is equal to any challenge.

PENETRATING ELEGANCE. INTO EVERY DETAIL.

In the BMW X6, style and sportiness merge into an exclusive whole. Superbly crafted fine materials create an atmosphere in which you can enjoy impressive dynamics with all your senses. The sport leather steering wheel demonstrates an orientation to performance – with its 8-speed sport automatic transmission Steptronic paddles you can change gears motorsport-style in a fraction of a second. A pull on the left paddle and you downshift, a pull on the right and you change up. Kneepads also give your legs better lateral grip – a particular advantage when taking bends at speed. The raised seating position gives you an unparalleled view of the surrounding traffic. All the controls are laid out clearly and intuitively and, if you so desire, with the leather-clad BMW Individual dashboard, you can choose to further accentuate the sheer exclusivity of this Sport Activity Coupé.

FOUR DOORS ARE UNUSUAL ENOUGH FOR A COUPÉ. FOR SOMETHING REALLY UNIQUE, JUST OPEN ONE.

In the BMW X6, you can look forward not only to an exceptionally dynamic driving experience but also an unexpectedly generous feeling of space. Space in which comfort and sportiness form a perfect harmony. The soft leather (optional) demands to be stroked. Clear aesthetic and luxurious touches create an atmosphere of absolute exclusivity. The optional, individually operable 4-zone automatic air conditioning supplies an ideal environment to each of the four, or optional five, seats. Down to the smallest detail, the BMW X6 fulfils the highest expectations.

BMW EFFICIENT DYNAMICS – MAKING A LITTLE GO A LONG WAY.

BMW was one of the first manufacturers to pursue the goal of efficient drive technologies, as a part of our multiple award-winning sustainability strategy. BMW EfficientDynamics, included as standard, is a comprehensive, multi-award-winning technology package designed to reduce fuel consumption and emissions – while simultaneously enhancing dynamic performance. With it, the BMW Group has been able to reduce the CO₂ emissions of its European new-vehicle fleet by about 30% since 1995. There are now 39 models¹ producing less than 140 g of CO₂ per kilometre, and more than two million vehicles equipped with Efficient Dynamics have been delivered to customers. The BMW Group intends to achieve a further 25% reduction in CO₂ emissions by 2020.

Different paths to the same destination: unmistakable BMW driving pleasure. Under the umbrella of the BMW EfficientDynamics project, BMW is continuously developing innovative systems that will bring us closer to the goal of emission-free mobility in the long term. This BMW initiative for more driving pleasure is based on several pillars:

Technology package. The optimisation of vehicles powered by conventional diesel and petrol engines continues apace. A comprehensive technology package enables the reduction of fuel consumption and emissions, while at the same time increasing power output and driving enjoyment. These advances are based on innovations such as BMW TwinPower Turbo technology, Brake Energy Regeneration, air vent control and many others.

BMW ActiveHybrid. The BMW ActiveHybrid X6 and BMW ActiveHybrid 7 represent the first two volume hybrid models in the BMW model range. They both combine high efficiency with superior dynamic performance.

BMW ActiveE. 2011 will see the debut of a new type of dynamism: the BMW ActiveE. Powered by electricity alone, it is manufactured in a small production run, as part of a pilot project. In this way, BMW is preparing the way for the emissions-free mobility of tomorrow.

BMW Hydrogen. BMW continues its research into alternative drive concepts for the future, such as hydrogen drive.

The BMW i brand will launch completely new vehicle concepts for sustainable mobility in an urban environment, such as the BMW i3 (Megacity Vehicle) and the BMW i8. Key features of these vehicle concepts include the use of lightweight materials such as CFRP, electric drive systems, powerful battery technology and eco-friendly production methods. BMW EfficientDynamics technologies are also an important part of BMW i vehicles.

➤ www.bmw-i.com

Vision becomes reality. The BMW Vision EfficientDynamics underscores the position of BMW as the world's leading manufacturer of exceptionally sporty yet incomparably efficient vehicles. The BMW Vision EfficientDynamics features advanced plug-in hybrid technology with a system output of 241 kW (328 hp). This ensures sports car-level performance (0–100 km/h in 4.8 seconds) combined with the fuel consumption of a city car (3.76 litres per 100 km, 99 g of CO₂ per km). BMW will offer the BMW i8, a production model based on this vehicle concept, under the BMW i brand, enabling drivers to experience this unique combination of dynamic ability and fuel efficiency on the road.

➤ www.bmw.com/EfficientDynamics

BMW EFFICIENT DYNAMICS INNOVATIONS IN THE BMW X6, AT A GLANCE.

BMW TwinPower Turbo technology.

This combines the latest fuel injection technology, fully variable power control and innovative turbocharging technology to increase efficiency and dynamics.

Air vent control.

Engine management signals the engine's current cooling requirements while driving, rendering a permanent airstream through the radiator unnecessary. The air vents in front of the radiator open or close depending on the outside temperature and road speed. When shut they improve aerodynamics, shorten the engine's warm-up time and so reduce fuel consumption.

Tyres with reduced rolling-resistance.

When a car is being driven, its tyres are constantly changing shape. This uses up energy and thus fuel. Tyres with reduced rolling-resistance have an improved design and use special materials for their road treads and side walls, therefore reducing deformation.

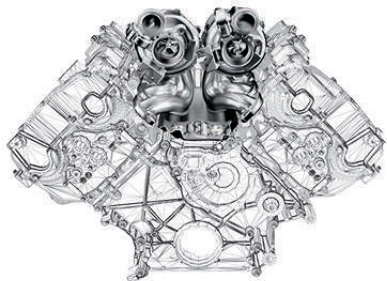

Brake Energy Regeneration.

To supply a battery with electrical energy, the generator (alternator) is permanently driven using engine power, which demands additional fuel consumption. Brake Energy Regeneration means the generator usually only creates electricity when the driver either takes his foot off the accelerator or applies the brakes – previously unused kinetic energy is transformed in coasting mode into electrical energy before being fed into the battery. In this way, electricity is generated while coasting, without consuming fuel.

Some BMW EfficientDynamics features are dependent on the car's equipment and are not available for all model variants. Your BMW partner will be happy to provide you with information on all equipment details.

¹ As of 07/2011.

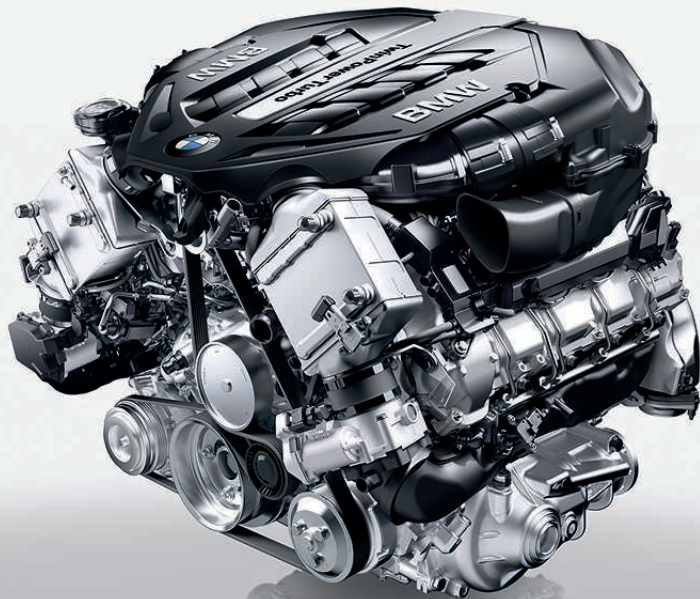

BMW EfficientDynamics
Less emissions. More driving pleasure.

Commanding power at all times: the BMW TwinPower Turbo V8 engine with High Precision Injection has two turbochargers compactly arranged between the cylinder banks.

A SPORTING PRESENCE WITH ACCELERATION TO MATCH. THE BMW TWIN POWER TURBO V8.

The range of powerplants effortlessly keep the promise made by the design of the BMW X6. Instantaneous power development and masterful refinement provide undiluted driving pleasure. Breathtaking acceleration figures and a rousing soundtrack define the V8 engine with BMW TwinPower Turbo in the X6 xDrive50i. The immediately responsive powerplant, which combines two turbochargers, Double VANOS and High Precision Injection, requires just 5.4 seconds for the sprint from 0 to 100 km/h. It develops output of 300 kW (407 hp) from its 4.4-litre displacement and delivers impressive torque of 600 Nm as low down as 1,750 rpm, through to 4,500 rpm. High Precision Injection also ensures efficient fuel combustion. The result: average economy of 12.5 l/100 km.

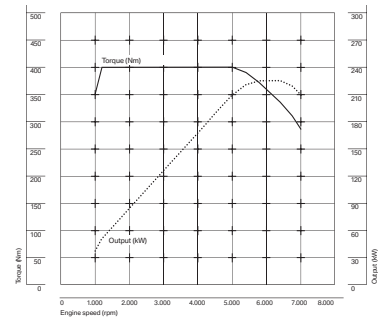

BMW EfficientDynamics
Less emissions. More driving pleasure.

SIX CYLINDERS. TWIN POWER TURBOCHARGER. ONE UNIQUE FEELING.

With its powerful BMW TwinTurbo six-cylinder in-line engine, and the combination of a TwinScroll turbocharger, Valvetronic, Double VANOS and High Precision Injection, the X6 xDrive35i sprints from 0 to 100 km/h in 6.7 seconds. Instant responses, refinement and smoothness, plus torque of 400 Nm, are the stand-out features of this powerplant with 225 kW (306 hp) and displacement of 3.0 litres. It's also an intelligent technology package that significantly reduces fuel consumption, delivering an average of 10.1 litres per 100 km. The engines for the BMW X6 are not only among the sportiest in the world, thanks to a host of innovative technologies such as the TwinPower turbocharger, they are also some of the most efficient due to features including Brake Energy Regeneration. It all makes for greater output and lower fuel consumption.

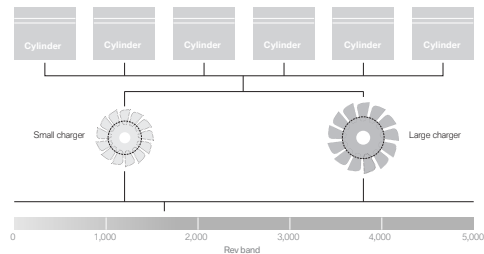

(For more information on fuel consumption and CO₂ emissions, turn to pages 62 | 63.)

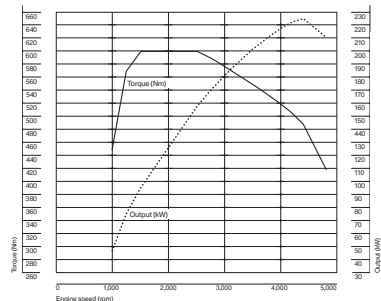

High revs meet pulling power: spontaneous responses and maximum torque on tap early on – such as here in the BMW X6 xDrive35i – ensure impressive driving performance.

POWER EXPRESSED IN A SINGLE LETTER: D.

BMW diesel engines impress with their incomparable performance while making extremely efficient use of fuel. Take the BMW X6 xDrive40d with BMW TwinPower Turbo technology. This is one of the world's sportiest diesels, bringing supreme, unadulterated power to the road. It takes the BMW from a standstill to the 100 km/h mark in only 6.5 seconds. The 3.0-litre engine's remarkably spirited nature comes from 225 kW (306 hp) and peak torque of 600 Nm. It also delivers average fuel economy of 7.5 l/100 km.

Variable Twin Turbo technology of the BMW X6 xDrive40d uses two turbochargers of differing sizes in sequence to develop spontaneous power across the entire rev band. At low revs, the smaller turbocharger works alone, while the larger one ensures top performance up to the maximum engine speed.

Outstanding power: the BMW X6 xDrive40d reaches its peak torque of 600 Nm at only 1,500 rpm. The engine provides impressive thrust across the whole rev range.

A DIESEL THAT TURNS TORQUE INTO TOTAL PLEASURE.

The powerful six-cylinder diesel engine with a 3.0-litre displacement in the X6 xDrive30d combines efficiency and power to impressive effect. Torque of 540 Nm as low down as 1,750 rpm and 180 kW (245 hp) of output enable acceleration of 0 to 100 km/h in 7.5 seconds. The four-valve cylinder head and turbocharger with adjustable blades ensure optimum fuel supply to the cylinders and thus particularly efficient fuel combustion. Indeed, average fuel consumption works out at an economical 7.4 l/100 km with CO₂ emissions of 195 g/km.

For more information on fuel consumption and CO₂ emissions, turn to pages 62 | 63.

BMW EfficientDynamics
Less emissions. More driving pleasure.

THE MOST DYNAMIC WAY TO DRIVE A HYBRID.

The BMW ActiveHybrid X6 is the world's first Sport Activity coupé with a hybrid drive system. It unites exemplary efficiency with hallmark BMW dynamics and driving pleasure. The combination of a combustion engine and an electric unit with storage battery allows for particularly efficient energy management. BMW ActiveHybrid combines this technology with typical BMW driving characteristics. The upshot is a hybrid combining low fuel consumption with impressive performance data – a true BMW, in other words. The advantages of an electric motor – maximum torque readily available from low engine speeds, for example – perfectly complement the dynamics and efficiency of BMW combustion engines. As well as reduced fuel consumption, the BMW-specific interpretation of hybrid technology also makes itself felt in something unmistakable: it is the most dynamic among the hybrids. The BMW ActiveHybrid X6 has two electric units that power the vehicle together with the combustion engine. At speeds of up to 65 km/h, the BMW ActiveHybrid X6 can run on energy from the high-performance battery. This offers the potential for maximum cuts in fuel consumption and emissions without restricting driving pleasure in any way.

 www.bmw.com/ActiveHybrid

Active Hybrid

YOU KNOW WHAT A HYBRID IS. YOU NEED TO KNOW WHAT BMW MAKES OF IT.

ARGUABLY THE BEST BRAKING POWER GENERATOR. The principle of Brake Energy Regeneration is as simple as it is intelligent. Each time you apply the brakes, kinetic energy is released which, in the ActiveHybrid models, is stored in a high-performance battery. It can then be reused by the drive system. This saves fuel while also ensuring that the energy gained from a braking action is not lost and can be used at any time to enhance overall output.

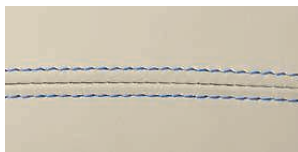

BMW ACTIVE HYBRID. ACCELERATES ACCELERATION. Perfect proof that enhanced efficiency can go hand in hand with maximum driving pleasure is provided by the boost function in the BMW ActiveHybrid models. It is based on the idea of the electric unit giving a temporary but significant boost to the combustion engine's output. A key advantage of this technology is that it allows very spontaneous and powerful output. It comes into its own particularly when moving off and during acceleration and overtaking. In this way, the car's performance is significantly enhanced without consuming extra fuel. It can only be a good thing when helping the sustainability cause brings so much pleasure.

EXPERIENCE STILLNESS. WITHOUT STANDING STILL. At speeds of up to 65 km/h, the BMW ActiveHybrid X6 is able to run on electric power for brief periods. At 60 km/h, the distance is up to 2.5 km. This occurs automatically and allows you to drive almost noiselessly and, above all, totally emission-free. An intelligent operating strategy controls the interplay of the combustion engine and the hybrid drive system, thus ensuring maximum efficiency and power at all times. You can hardly experience more serene driving pleasure than that.

INTELLIGENT ENERGY MANAGEMENT STARTS BEFORE YOU MOVE OFF. The BMW ActiveHybrid X6 is one of the first BMW models with an automatic transmission to feature an engine Start/Stop function. Every time you come to a standstill in a BMW ActiveHybrid model you actively save fuel thanks to the Hybrid Start/Stop function. That's because the engine switches off when the car is stationary. This cuts fuel consumption and emissions, above all in urban traffic. That way you do your fuel bills and the environment a favour.

Aerodynamically optimised: the 20" BMW Aero wheel light-alloy Streamline 297.

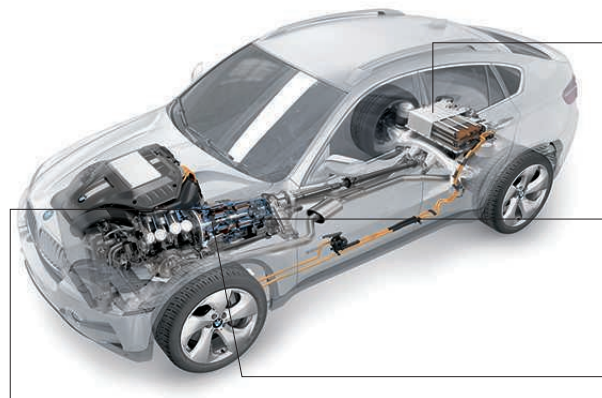

Eye-catching appeal: the blue decorative stitching creates a visual contrast and underlines the premium character of the interior.

Stylish welcome: door sill finisher with BMW ActiveHybrid lettering.

A clear graphic in the Control Display shows the power flows in the vehicle in real time: electric power is shown in blue, power from the combustion engine in red.

Battery: the space-saving, high-performance nickel-metal hydride battery stored under the luggage compartment is fully suited for everyday use while leaving enough room to transport up to four golf bags, as in the conventional BMW X6.

Electric air conditioning compressor: the electric drive of the air conditioning system is independent of the combustion engine, which means a pleasant climate can be created even when driving on electric power alone and at standstill when the engine is switched off.

Two-mode active transmission: this controls the interplay of the electric motor and the combustion engine. Mode 1 is available for starting off and mode 2 is optimised for higher speeds. Configuration as a 7-speed automatic transmission ensures a typical BMW driving experience, while manual gear changes can be carried out using the gearshift paddles on the steering wheel.

Two electric motors: these take over the function of starting the engine and back up the combustion engine as required in order to enhance driving dynamics. During Brake Energy Regeneration, the electric motors act as generators.

THE BEST WAY TO REACH YOUR GOALS IS THROUGH CLEVER POWER DISTRIBUTION.

More agile, more precise, and safer: Dynamic Performance Control¹, which celebrates its world premiere in the BMW X6, defines a new standard for sporty driving pleasure. Extremely high directional stability and flawless handling are the fruits of this technology. This is noticeable through corners in particular. Here it gives the BMW X6 appreciably greater agility. Dynamic Performance Control distributes drive flexibly between the rear wheels. In bends, the system channels more drive through the outer rear wheel – effectively pushing the car into the corner. The BMW therefore follows the path of the road accurately and offers incredibly precise handling. According to the driving situation, a greater proportion of torque is diverted efficiently to the wheel that can transfer most drive to the road. This allows any interventions from the Dynamic Stability Control (DSC) system – which were

required previously – to be minimised when accelerating out of corners. The result is even greater traction.

In addition, Dynamic Performance Control counteracts oversteer and understeer and increases the stability of the BMW X6. The control system also helps the driver on tricky road surfaces because more drive is sent to the rear wheel with better grip even when driving straight ahead. This results in a decisive improvement in traction and the X6 develops impressive thrust. In other words, Dynamic Performance Control allows you to enjoy the power of this car in any situation.

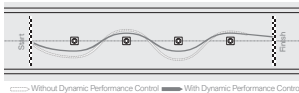

In a right-hand corner, the left rear wheel can transfer more power to the road, so Dynamic Performance Control distributes more drive to that wheel.

When driving straight ahead, equal power is sent to each of the rear wheels, generating optimum traction.

In a left-hand corner, Dynamic Performance Control sends more drive to the right rear wheel which, in this situation, can transfer more power to the road.

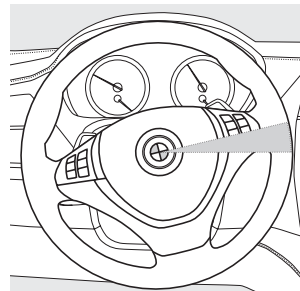

With Dynamic Performance Control, you can take corners with superb agility. Flexible drive distribution between the rear wheels not only lets you experience every steering manoeuvre with greater control and precision, but you will also enjoy a palpable increase in sportiness because this system actively distributes drive – resulting in optimal driving dynamics.

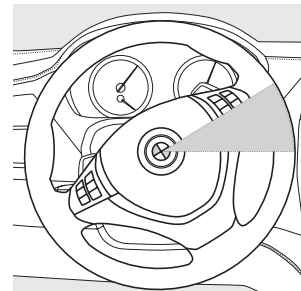

CORNERS CANNOT BE CHANGED. BUT YOU CAN ALWAYS GET MORE FUN OUT OF THEM.

The meticulously tuned chassis and intelligent four-wheel-drive system xDrive allow you to enjoy dynamic driving pleasure in any situation. It's a similar story with optional Active Steering². This ensures greater cornering enjoyment by enabling even more direct and precise steering – and greater agility on twisty sections of road in particular. Moreover, it lets you enjoy better tracking stability. A planetary gear set integrated into the steering column varies the steering angle according to the car's speed. At low and moderate speeds, the angle of the front wheels is increased – an advantage that also makes parking noticeably easier. When the steering wheel is turned by the same amount at high speeds, the steering angle is smaller and the BMW X6 remains precisely on track.

Greater agility is also provided by the optionally available Adaptive Drive system. This uses Servotronic to optimize steering forces during normal and dynamic driving and combines the two active chassis control systems Dynamic Damping Control and Dynamic Drive. These feature active stabilisers on the front and rear axles with integral hydraulic elements, which reduce roll to a minimum through corners. Plus, the dampers automatically reduce pitching movements in the BMW X6 – under braking, for example. The effect will put a smile on the face of not only the driver but each rear passenger, too, because they also benefit from the extraordinary level of stability and high comfort.

At low to medium speeds, Active Steering transmits steering input more directly. The response is very precise, making the BMW agile and manoeuvrable.

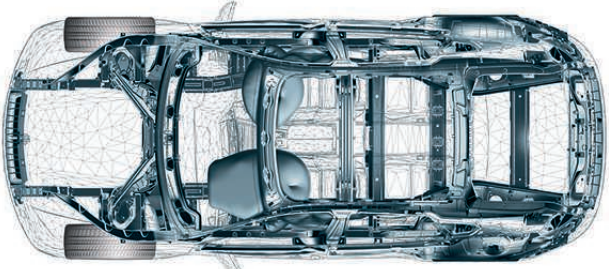

At higher speeds, the steering ratio is less direct. This ensures, for instance, precise tracking stability on the motorway, making for especially safe steering movements.

¹ Not for ActiveHybrid X6.
² Not available for ActiveHybrid X6. This model features electro-mechanical steering which provides optimal steering assistance in both electric and combustion engine mode.

The optional Adaptive Headlights register when you are turning into a bend or driving through hollows or over crests. The swivelling and vertically adjustable headlights follow the direction of steering and optimally illuminate the line of the curve.

The high-strength steel passenger cell offers optimum rigidity and protection. It boasts additional reinforcement in critical areas for maximum safety. In the event of a collision, continuous headairbags, a driver and front passenger airbag and two side airbags in the front minimise the risk of injury.

RELAX AND LET YOUR HEART BEAT FASTER.

The BMW X6 offers you and your passengers outstanding all-round protection. A wealth of intelligent systems ensure maximum safety at all times, while you enjoy the driving pleasure. The Adaptive Headlights with variable light distribution including turning lights provide increased active safety in the dark or poor light conditions. This technology features horizontally pivoting headlights which provide optimum illumination of corners as soon as you steer into them. Sensors record the steering angle, yaw rate and speed. Electric motors then turn the Xenon headlights as required, providing better illumination of the full corner. In addition, when driving through hollows or over crests, the beam is automatically adjusted vertically. The Dynamic Stability Control (DSC) system also guarantees unencumbered driving pleasure. DSC recognises unstable driving situations at the outset and corrects them through targeted intervention in the engine and brake management systems. In the event of emergency braking, you will be backed up by the Brake Assistant. This recognises the situation and ensures that brake pressure is built up extremely rapidly – if necessary as far as the ABS control range. This significantly shortens the stopping distance.

You can add to that a raft of developments that protect you from injury in a collision. The use of high-strength multi-phase steels has allowed our engineers to create an extremely stable passenger cell

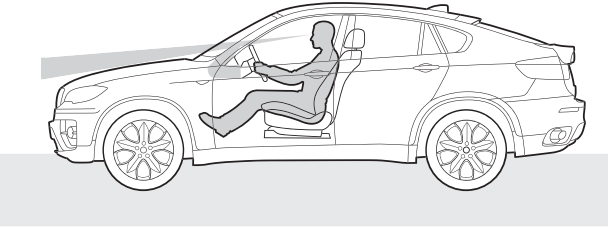

offering occupants exceptional safety in an impact. In a frontal collision, a pre-defined deformation area converts impact energy into deformation before it reaches the passenger cell. In a rear impact, the strengthened body also enhances safety, as numerous crash tests have confirmed. High-strength structural reinforcement has been integrated into all four doors to protect the passengers in a side-on collision and reduces intrusions into the passenger cell as far as possible. Occupants are also protected by optimally coordinated restraint systems such as seat belts and six airbags which increase safety in virtually all accident scenarios. The head airbag system prevents occupants in all seats from hitting the side windows or the object the car has collided with, and offers full-length protection from shattered glass.

The three-point seat belt system on all seats (with additional integral pyrotechnical belt tensioners and belt-force limiters on the front seats) provides optimum restraint in all types of accident. Plus, the rollover sensor evaluates data supplied by the DSC system and, in the event of the car rolling over, can trigger passive safety systems such as the head airbag system, belt tensioners and active headrests. At the end of the day, driving pleasure is the only thing that should make your heart beat faster in the BMW X6.

EVERYTHING IN VIEW – INCLUDING THE ROAD.

The optional BMW Head-up Display for the BMW X6 makes a major contribution to safety. A projection unit in the instrument panel uses a TFT display to beam, in virtually all light conditions, an easy-to-read, high-contrast image into the driver's field of vision. This allows you to read important data from the image without taking your eyes off the road. The height- and brightness-adjustable display, in which each pixel consists of an individually managed transistor, produces strong light and presents a wide range of information – from current speed and information from the optional Speed Limit Info to navigation arrows for your journey. Thus, you are informed of the current status of the car without having to shift your line of sight significantly.

The optional BMW Head-up Display projects relevant information, such as the car's speed, directly into the driver's field of vision. The height- and brightness-adjustable display ensures that the driver's eyes remain focused on the road.

BMW CONNECTED DRIVE* – FOR MORE CONVENIENCE, INFOTAINMENT AND SAFETY.

Our world is becoming more connected every day. For BMW drivers, it has become the norm to communicate with the wider world from the comfort of their vehicles – they can request information, telephone or send email and generally keep up to date. BMW ConnectedDrive establishes, on request, the optimum networking of driver, vehicle and outside world – any time, anywhere. See right for selected highlights relating to comfort, infotainment and safety. For a complete overview of the BMW ConnectedDrive range, please visit www.bmw.com/ConnectedDrive

Revolutionising mobile networking. The BMW Vision ConnectedDrive is a visionary roadster with a design that exhilarates from the very first glance. Its dynamic, flowing contours lead the eye from the striking front and along the stretched bonnet of this extraordinary vehicle – a synthesis of exterior and interior. Each of the three levels of the interior stands for one of three BMW ConnectedDrive components – convenience, infotainment and safety. The accompanying functions and controls are illuminated in different colours, which literally radiate a pulsating array of information. More information about this concept vehicle and further research projects is available in the new Future Lab.

➤ www.bmw.com/futurelab

Convenience.

Active Cruise Control with Stop&Go function. Optional, for added convenience and active safety in stop-and-go traffic. The system measures the gap to the vehicle ahead on an ongoing basis and automatically maintains an appropriate distance. Once the lane ahead becomes free, the system accelerates again up to the desired speed.

Park Distance Control, rear view camera and Top View. The optional Park Distance Control (PDC) uses optical and acoustic signals to ensure comfortable and safe parking. Top View offers the driver an overview of their surroundings while manoeuvring the vehicle, via a bird's eye view of the BMW on the Control Display. In addition, the rear view camera provides a better view when you're reversing at under 20 km/h or parking.

Infotainment.

BMW Connected App*. For the first time, you can now use apps in your BMW. With the Apps option, an iPhone and the free BMW Connected App from the Apple App Store, you're no longer limited to just listening to local radio, your calendar is with you all the time and you're always in contact with your friends. Using the iDrive system, you can easily select web radio stations from around the world. You can also call up the latest status reports from your Facebook or Twitter accounts and view upcoming appointments on the Control Display, or even have them read to you through the audio system's speakers. And that's just the beginning, more functions and apps will follow in the future.

Safety.

BMW Head-Up Display. The BMW Head-Up Display is optionally available, to help you keep your eye on the surrounding traffic. Relevant driving information is projected directly in the driver's field of vision via a multi-coloured TFT display, showing you for example the vehicle's speed or navigational directions right before your eyes.

  BMW standard/optional equipment
 • Recommended colour combination
 — Not available

¹ Not available for the ActiveHybrid X6.

⁴ Standard on the ActiveHybrid X6.

⁵ Standard on the X6 xDrive50i, xDrive40d and ActiveHybrid X6.

⁶ In conjunction with Edition Exclusive, available with black contrasting stitching.

³ Available in conjunction with optional active seat ventilation front, perforated.

POWERFUL AND AUTHORITATIVE.

The optional exterior colour Black Sapphire metallic underlines the authoritative presence exuded by the BMW X6. The aluminium running board and the optional 20" light-alloy wheels in Y-spoke 214 design with mixed tyres round off the finely-tuned athletic exterior. The BMW Individual High-gloss Shadow Line (optional) ensures an even more radiant appearance. Inside the car, the optionally available finely grained Exclusive Nappa leather, extended, captures the imagination. The leather shade Beige offers an intriguing contrast to the exterior colour of the car, while the optional interior trim strips come in fine-wood Ash Grain.

□ **20" light-alloy wheels Y-spoke 337** with mixed, runflat tyres: 10 J x 20 with 275/40 R 20 tyres at the front; 11 J x 20 with 315/35 R 20 tyres at the rear.

Aluminium **door sills** with "BMW Edition" logo. **Velour mats** match the upholstery with bordering in the colour Oyster.

ELEGANCE IS A SPECIAL KIND OF STYLE.

□ With its impressive, noble presence, the exclusive Edition model, shown here, is the very picture of timeless elegance. This BMW X6 captivates in Mineral Silver metallic, one of 11 carefully selected Edition paint finishes, and with its optional Edition Exclusive 20" light-alloy wheels Y-spoke 337 with mixed tyres, it will always stand out. Inside the BMW Edition Exclusive, electrically adjustable sport seats with soft Nevada leather in light Oyster immediately catch the eye, while black contrasting stitching underscores the high quality of the finish. It all shows exquisite attention to detail – and it's a joy to behold. The interior trim in fine-wood Bamboo Grain, dark, further enhances the atmosphere of comfort and style, while BMW Individual roof liner in elegant Anthracite rounds off the overall impression in subtle, harmonious fashion. This model makes one overall statement, however. And it's a message encapsulated on arrival by front door sill trims that carry "BMW Edition" in chrome plating – the high value you place on individuality and style.

THE FIRST COUPÉ WITH TRUE LARGESSE.

The BMW X6 is an extremely accommodating vehicle. The only thing not welcome here is limitation. The luggage compartment offers 570 litres of space (ActiveHybrid X6: 470 litres). And the 60:40 split/folding rear seats expand boot capacity to as much as 1,450 litres (ActiveHybrid X6: 1,350). This makes the BMW X6 open to any undertaking and allows it to swallow up even bulky items of luggage or sport equipment – e.g. up to four golf bags. The practical luggage compartment cover can even be stowed away in the boot floor. And there is an optional package that allows more secure equipment storage. This is a coupé whose generous space has been thought out down to the last detail.

The flexible luggage compartment offers 570 litres of space. This capacity can be increased further according to need.

The rear seat backrests can be split 60:40 to allow large or unwieldy items of luggage to be stowed away easily.

Folding the rear seat backrests down fully creates a virtually level luggage compartment offering capacity of 1,450 litres.

BMW X6 rear diffuser.

BMW X6 ornamental front grille, black.

BMW X6 tail fins.

JOY IS THE CRUCIAL COMPONENT. BMW PERFORMANCE.

Buying a BMW means choosing sportiness, dynamics and innovative technologies. These are attributes that accept no compromise, attributes you can lend even stronger expression to with the BMW Performance product line. Many technical and visual components from the areas of aerodynamics and the chassis as well as the cockpit and drivetrain all serve a single goal: to turn the

fascination of dynamics into an even more intense experience. The BMW Performance product line was, after all, developed for people who are passionate about technical excellence and who want to show this passion. Your BMW Service partner will be happy to advise on the entire range of BMW Performance accessories and provide you with a special brochure. Further information is also available at:

■ Standard equipment □ Optional equipment

■ **Xenon headlights for high and low beam**

incl. automatic headlight range control and headlight washing system, for much better illumination of the road ahead in bad weather, at night or in poor visibility. The four light rings offer a daytime driving light function, and can also be used as parking lights.

□ **Adaptive headlights** with variable light distribution, incl. turning lights, optimally illuminate bends by swivelling headlights as soon as the driver turns the steering wheel.

The beam is also automatically adjusted vertically when, for instance, driving over crests or through hollows. The turning lights in the fog lights are automatically activated even at a standstill, when the indicator is used or with a steering lock of over 10 degrees.

□ **High-beam assistant** aids the driver at night by automatically switching from high to low beam.

■ **Fog lights** in free-form technology, integrated in the front air dam, ensure extra safety in poor visibility.

■ **Headlight washing system** provides optimal illumination of the road ahead in all weather conditions. Headlights are automatically cleaned in parallel with the windscreen when the lights are on.

□ **Lights package** includes rear reading lights, rear footwell lights, indirectly lit door pockets, exit lights and vicinity lighting in the outside door handles (with comfort access option). This ensures that the area around the door is evenly lit when the door is unlocked, making getting in and out easy and safe.

■ **Dynamic Braking Lights** make it easier for drivers following from behind to see how hard you are applying the brakes. If you are braking normally, the brake lights cover a large area, but only during emergency braking do the brake lights start to flash. This allows following traffic to distinguish between a slight tap on the brakes and full braking – for even greater safety on the road.

■ **Rain sensor incl. automatic driving lights control:** once activated, the rain sensor automatically switches on the windshield wipers and controls wiper frequency, depending on how hard it is raining. This feature includes automatic driving lights control, switching on the low-beam headlights automatically, for example, when it gets dark or when entering a tunnel.

■ **Exterior mirrors, electrically adjustable and heated,** finished in body colour (mirror foot in black), in aspheric design and blue-tinted.
 □ **Exterior mirrors, with automatic anti-glare function,** incl. fold-in and automatic parking functions (standard on ActiveHybrid X6).

□ **Sun-protection glazing*** for the rear side windows (behind the B-pillar) and rear window. These tinted windows reduce sun glare and ensure a pleasant temperature inside the car even in hot weather.

□ **BMW Individual High-gloss Shadow Line** covers window cavity cover and window frames in Black, high-gloss.
 □ **Soft Close Automatic:** an electric motor pulls all four doors gently closed when they are within a few millimetres of the lock.

□ **Roof railing, matt silver:** harmoniously integrated with the car's design, it provides a base for the multifunctional BMW roof carrier for effortless and secure transportation of luggage, bicycles, surfboards etc.

□ **Roof railing, matt black:** the roof railing is also available in black to lend an individual touch to the exterior of the BMW X6.

□ **Aluminium running boards** (105 mm wide) with rubber inserts give the BMW X6 a particularly individual touch.

□ **Trailer tow hitch** with detachable ball head. Provides a maximum towing capacity of 3,500 kg.

■ Standard equipment □ Optional equipment

Front ornamental grille with Titanium-coloured slats in the kidney grille and chrome surround (standard on the X6 xDrive50i, X6 xDrive40d and ActiveHybrid X6; shown here in combination with the Sport package; with air inlet grille in contrasting colour).

Tailpipes: the X6 xDrive35i, X6 xDrive30d and X6 xDrive40d models come with two single tailpipes. The exhaust system is made of high-quality stainless steel. The visible tailpipes are trimmed in chrome.

Tailpipes: for the X6 xDrive50i and ActiveHybrid X6 models, the exhaust system with two rectangular tailpipes is made of high-quality stainless steel, the rear ends bordered with a chrome trim.

■ 19" light-alloy wheels **Star-spoke 232**, 9 J x 19, with 255/50 R 19 runflat tyres (standard for X6 xDrive35i, X6 xDrive30d and X6 xDrive40d).

□ 19" light-alloy wheels **V-spoke 257**, 9 J x 19 with 255/50 R 19 runflat tyres (standard for X6 xDrive50i), also available as a complete set of winter wheels from the Original BMW Accessories range*.

□ 19" light-alloy wheels **Star-spoke 258** with mixed runflat tyres, 9 J x 19 with 255/50 R 19 tyres at the front, 10 J x 19 with 285/45 R 19 tyres at the rear (only available in combination with Sport package).

□ 20" light-alloy wheels **Star-spoke 259** with mixed runflat tyres, 10 J x 20 with 275/40 R 20 tyres at the front, 11 J x 20 with 315/35 R 20 tyres at the rear.

□ 20" light-alloy Aero wheels **Streamline 297** with mixed runflat tyres, 10 J x 20 with 275/40 R 20 tyres at the front, 11 J x 20 with 315/35 R 20 tyres at the rear (standard on ActiveHybrid X6).

□ 20" light-alloy wheels **Y-spoke 214** with mixed runflat tyres, 10 J x 20 at the front on 275/40 R 20 tyres, 11 J x 20 at the rear on 315/35 R 20 tyres.

□ 20" light-alloy wheels **Y-spoke 214** in black with mixed runflat tyres, 10 J x 20 with 275/40 R 20 tyres at the front, 11 J x 20 with 315/35 R 20 tyres at the rear.

□ 20" light-alloy wheels **Y-spoke 337** with mixed, runflat tyres: 10 J x 20 with 275/40 R 20 tyres at the front; 11 J x 20 with 315/35 R 20 tyres at the rear. (Available in conjunction with Edition Exclusive.)

* The offer may vary by country.

■ Standard equipment □ Optional equipment

■ **Sport leather steering wheel**, three-spoke, incl. multifunction buttons and uni-directional gearshift paddles. A light pull on the left paddle downshifts, a pull on the right changes up.

□ **Lane Departure Warning System** uses a camera to recognise whether the vehicle is threatening to stray outside the limits of the lane and alerts the driver by making the steering wheel vibrate.

□ **M leather steering wheel**, three-spoke, incl. multifunction buttons and uni-directional gearshift paddles. A simple pull of the left paddle downshifts, a pull on the right changes up.

□ **Voice control system** for adjusting e.g. radio station, navigation routes and telephone entries while driving. Functions are shown on the Control Display at the same time (this feature is included as part of the optional Navigation system Professional*).

□ **Steering wheel heating**: just press a button to quickly warm up the steering wheel rim – a particularly pleasant amenity in winter.

■ **Start/Stop button¹**: after inserting the ignition key you can start or stop the engine by pressing the button.

■ **Dynamic Performance Control Display²** shows the distribution of drive by xDrive between the front and rear axle and the flexible distribution of power between the rear wheels by Dynamic Performance Control.

¹ Not available for ActiveHybrid X6. In this model an electric motor is responsible for the extremely quiet engine start (Hybrid Start/Stop).

² Not available for ActiveHybrid X6.

* May not be available in all countries. Please consult your BMW partner.

■ **Controller:** various functions can be activated from the Control Display using this rotary/push button. Four menus can also be called up using direct menu control buttons: CD, radio, navigation and telephone. The other three buttons – Menu, Option and Back – make for easier operation.

■ **Functional bookmarks:** with these buttons, the driver and passenger can save their most frequently used navigation, audio (e.g. certain radio stations or CD tracks) or telephone functions on eight separate buttons for rapid access.

■ **Control Display** with TFT screen (6.5", colour). Shows the functions activated by the Controller (e.g. on-board computer or radio). In conjunction with the optional Navigation system Professional* or with the TV function, the screen measures 8.8".

□ **Navigation system Professional*** with high-resolution colour 8.8" display, incl. hard disk also for music files that can be transferred from a CD, MP3 player or USB stick; dynamic route planning with traffic guidance provided by voice information or 3D route map, RTTI capability, split-screen function (standard on ActiveHybrid X6).

□ **TV function** allows you to use the Control Display as a television when the vehicle is stationary. Both analogue and digital (DVB-T) channels broadcast by terrestrial stations can be received.

□ **Apps*.** Together with an iPhone and the free BMW Connected App from the Apple App Store, this optional equipment allows you to tune in to international online radio stations via the iDrive, or view your friends' Facebook or Twitter status updates on the Control Display.

□ **Rear view camera with Top View** clearly shows the rear and side areas of the vehicle on the Control Display. Interactive track lines indicate, for example, whether the desired parking space is large enough for the vehicle. In addition, the image area of the tow bar is enlarged. The rear view camera is automatically activated when reverse gear is engaged (standard on ActiveHybrid X6).

□ **Side View** provides a view of traffic when pulling out of exits and junctions with restricted visibility. Two cameras are integrated in the side of the front bumper; images are shown on the Control Display (not available for ActiveHybrid X6).

□ **Park Distance Control (PDC),** front (standard at the rear), makes parking and manoeuvring easier. The distance between the car and the nearest obstacle is signalled acoustically as well as visually in the Control Display (standard on ActiveHybrid X6).

□ **Auxiliary heating with remote control,** ideal in winter and in cold weather. When you step into your vehicle, the windscreen is already free of ice and the interior is pleasantly warm (not available for ActiveHybrid X6).

■ Standard equipment □ Optional equipment

■ **Cruise Control with braking function** (without braking function in the ActiveHybrid) facilitates comfortable driving at a pre-selected speed.

□ **Active Cruise Control with Stop&Go function:** for increased comfort and active safety when driving in slow-moving traffic. Combines Cruise Control with active safe distance control to bring the car to a standstill in bumper-to-bumper driving, with automatic restart in typical “Stop&Go” situations.

■ **8-gear sport automatic transmission Steptronic.** Gears are shifted very quickly and smoothly for optimum performance.

■ **Two-mode active transmission:** configured as a 7-speed automatic transmission, it ensures maximum driving dynamics and efficiency in the ActiveHybrid X6.

■ **Parking brake with Auto-Hold function** provides the convenience of being able to hold and release the vehicle by means of a button in the centre console.

□ Sport button to select a firmer suspension setting (integrated with the **Adaptive Drive** option).

■ **Cupholders:** two each in the centre console at the front and the rear.

■ **Armrest, front,** on the tunnel console, can be positioned separately for driver and passenger. With storage compartment.

■ **AUX-IN connection** for an external audio source, e.g. an MP3 player.

■ **Storage options** for a wide range of items are available in the centre console, rear (shown here), in the front and rear doors and in a stowaway tray in the rear on the right.

■ **Kneepads,** for driver and front passenger, in the centre console. Ensure greater comfort and lateral support – especially when cornering at speed.

■ **Automatic air conditioning**, incl. microfilter, to provide an ideal climate in any season, automatic temperature and air volume control, vent programme and rear ventilation; settings displayed on Control Display (standard on the X6 xDrive35i and X6 xDrive30d).

□ **2-zone automatic air conditioning**, incl. Automatic Air Recirculation (AAR) with circulation filter, solar and fogging sensor, automatic temperature control (separate for driver and passenger) as well as air volume control; display and settings on the Control Display (standard on the X6 xDrive50i and X6 xDrive40d).

□ **4-zone automatic air conditioning**. As for 2-zone air conditioning, plus the climate in the rear of the vehicle can be separately controlled with two dials and a display. This feature includes an additional blower and footwell air outlet in the rear (standard on ActiveHybrid X6).

■ **Radio BMW Professional**, 4-channel amplifier, 2-tuner reception, antenna diversity, scan function, CD player, MP3 decoder, six loudspeakers.

□ **DAB tuner** for reception of digital radio programmes. DAB+ enabled.

□ **USB/audio interface** in the storage compartment under the front armrest for connecting a USB stick or external audio sources such as an iPod (standard on ActiveHybrid X6).

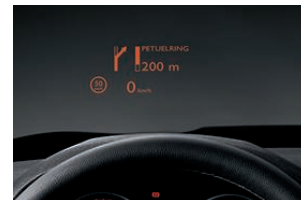

□ **DVD changer**, 6-disc single slot changer, with features including scan function, random play and MP3 decoder; installed in the glove compartment (not available for ActiveHybrid X6).
□ In conjunction with on-board monitor with TV or Navigation system Professional* with additional video function.

□ **HiFi loudspeaker system** with digital amplifier (205-watt) and 12 loudspeakers, as well as digital equalizing which adapts the sound optimally to the shape of the vehicle interior.

□ **HiFi system Professional** with a 600-watt digital amplifier and 16 loudspeakers guarantees a high-intensity audio experience at every seat (standard on ActiveHybrid X6).

□ **BMW Individual High-End Audio System** with 9-channel digital amplifier (825 W output), together with 16 particularly powerful loudspeakers featuring exclusive neodym magnet drivers, creates sound quality comparable to a live concert performance. Volume and equalising automatically adjust to the driving speed.

□ **BMW Head-up Display** projects relevant information, directly into the driver's field of vision (standard on ActiveHybrid X6).

□ **Speed Limit Info** detects speed limits and shows the driver the currently applicable speed limit in the Info Display or the optional BMW Head-up Display (only in conjunction with Navigation system Professional*).

■ Standard equipment □ Optional equipment

□ **Five-seat configuration** is available on request. It features three head-restraints in the rear, three-point seatbelts for all seats and integrated belt catches for the outer seats.

□ **Sport seats** with highly contoured sides provide optimal lateral support for driver and front passenger. Seat height, seat angle, backrest angle and forward/back position are electrically adjustable, thigh support manually adjustable. The driver's seat, driver's head-restraint height, exterior mirrors and steering column feature a memory function (only available in conjunction with leather upholstery).

■ **Standard seats**, with manual adjustment forward/back, for driver's seat angle, headrest height and angle, as well as electrical adjustment for seat height, and backrest angle (not available for ActiveHybrid X6).

□ **Comfort seats** for driver and passenger (standard on the ActiveHybrid X6). The seats have comfort head-restraints with electrically adjustable head-restraint height and mechanically folding side bolsters. The thigh support and upper seat back are also electrically adjustable, as is the seat height (only available in conjunction with leather upholstery and automatic air conditioning with 2- or 4-zone control).

■ **Two rear seats**, with sporty, individual character (not adjustable) and integral head-restraints. The seats also come with a fold-out centre armrest and two cupholders in the rear centre console.

☐ **Sunblinds:** manual sunblinds on each rear side window for effective protection from intense sunglare.

☐ **Seat adjustment, electric,** of driver's and front passenger's seats, with memory function for driver's seat, steering column and exterior mirrors, incl. easy access (standard on the X6 xDrive50i, X6 xDrive40d and ActiveHybrid X6).
 ☐ **Lumbar support** on driver's and front passenger's seats, electrically adjustable for height and depth, to provide a perfectly ergonomic seating position and support back muscles (standard on ActiveHybrid X6).

☐ **Seat heating for driver and front passenger:** seat surfaces and backrests with heating in three stages for pleasant temperatures shortly after setting off (standard on ActiveHybrid X6).

☐ **Active seat ventilation**¹ provides a noticeably more comfortable ride. Fans in the seat base and backrest blow air through the seat covers.
 ☐ **Active seat for driver** provides a relaxed seating position even over long distances. The seat surface moves up and down on either side, cyclically mobilising the pelvis and lumbar spine (available in conjunction with comfort seats and active seat ventilation).

☐ **BMW Individual instrument panel** with fine leather cover lends the interior a highly exclusive look.

☐ **Glass roof,** electric, with integral sun protection, comfort opening and closing via vehicle key and fingertip control (standard on ActiveHybrid X6).

☐ **BMW Individual roofliner Anthracite:** the A-, B-, C- and D-pillar trim as well as the sun visors and roof grab handles are finished in refined Black (included in Sport package).

☐ **Interior mirror and exterior mirrors,** with automatic anti-glare function which activates once a certain light intensity from following vehicles is reached. With fold-in function for exterior mirror (standard on ActiveHybrid X6).
 ☐ **Alarm system with remote control:** in any attempt to break into your car, the alarm system sets off a loud signal and immediately switches on the hazard warning lights.

¹ Available only in conjunction with Nevada leather, perforated, or BMW Individual Merino leather with perforation and comfort or active seats.

■ Standard equipment □ Optional equipment

■ **Rear seat backrest**, can be asymmetrically split 60:40 and individually folded down.

■ **Luggage compartment cover**, folding, can be removed easily and stowed away practically under the luggage compartment floor (storage facility not available for ActiveHybrid X6).

□ **Storage package** including a storage box under the front centre console, as well as two lashing rails with four lashing points and tensioning straps on the sides of the luggage compartment (standard on ActiveHybrid X6).

□ **Adaptive fastening system** for firmly securing differently-sized pieces of luggage (available in combination with the storage compartment package.)

□ **DVD system** in the rear offers an independently controllable DVD player with a fold-down 8" colour screen. The system can be operated by wireless remote control, has sockets for two headphones and a video source, and is compatible with infrared headphones. In conjunction with the TV function, the same TV programme can be viewed simultaneously on the front (at a standstill) and rear screens.

■ **Cupholders** integrated in the rear centre console.

□ **Seat heating at the rear:** same as the electric heating of the driver's and front passenger's seats, with heating in two stages, available in conjunction with leather upholstery.

□ **Ski bag** for clean and safe transport of up to four pairs of skis with up to four occupants in the car. Whenever the ski bag is not required, it remains stored conveniently and out of sight behind the centre armrest.

■ **Sockets** (12-V), one in the front storage box, one in the rear centre console and one in the luggage compartment.

■ **Central locking** for the doors, fuel cap, incl. electronic immobiliser and remote control with automatically recharging key battery.
□ **Comfort access system** for opening and locking the vehicle without holding the remote control. The engine can be started without the key using the Start/Stop button (standard on ActiveHybrid X6). This system also includes advance door handle illumination.

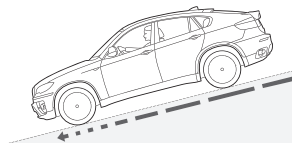

□ **BMW Service Inclusive***. Service costs are another area where your BMW Service partner can offer you an intelligent solution. With BMW Service Inclusive, routine maintenance work is provided at no extra cost to you, for the agreed duration or mileage. Find out more at www.bmw.com/serviceinclusive

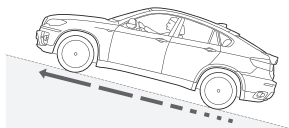

□ **BMW Welt:** taking delivery of a car has always ranked among the best moments for any driver. Now that moment can become a truly unforgettable day – at BMW Welt, the experience and delivery centre in Munich, Germany. Visit the Museum, tour the plant or explore the Technology studio: BMW Welt brings you the true fascination of BMW. Experience more online at www.bmw-welt.com

* This service may vary by country.

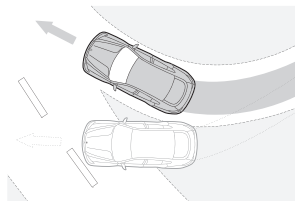

■ Standard equipment □ Optional equipment

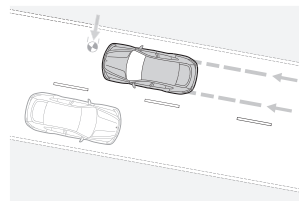

■ **Hill Descent Control (HDC)** enables your BMW to take even steep downhill gradients safely and automatically – without the need for you to apply the brakes. With the speed control with braking function, you can also change your speed using the drop arm in the lower left area of the cockpit.

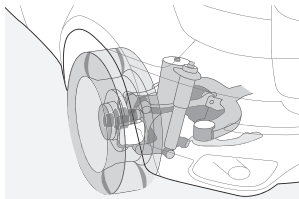

■ **Hill-Start assistant** stops the car rolling downhill for 1.5 seconds once the footbrake is released when making hill starts.

■ **Dynamic Stability Control (DSC)** incl. DTC and enhanced functions for optimising braking and driving stability. DSC detects any risk of swerving and stabilises the car within fractions of a second. The traction mode sub-function (DTC) enables increased wheel slip, in order to perfectly adapt forward thrust to every situation, for a more athletic drive.

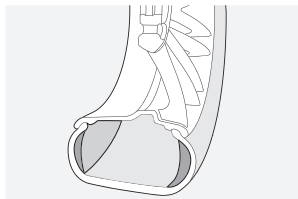

■ **Brake Assistant** provides brake assistance by building up maximum brake pressure in an emergency even if the driver fails to properly depress the brake pedal, significantly shortening the stopping distance in the process.

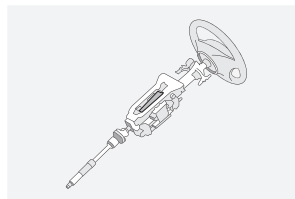

■ **Runflat indicator** minimises the possible repercussions of a tyre defect. Comparing wheel rotation speed, the system determines changes in air pressure in one or several tyres and warns the driver via Check/Control.

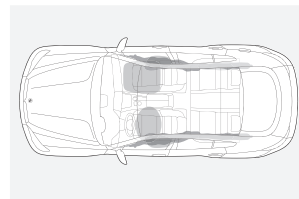

■ **Tyre Pressure Control (TPC)** uses sensors to monitor air pressure in the tyres at any speed. A slight loss in pressure is indicated by a light; a significant loss in pressure additionally triggers an acoustic warning (only on ActiveHybrid X6).

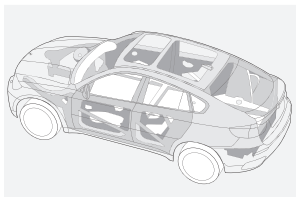

■ **Runflat tyres:** reinforced sidewalls mean that the tyres do not totally collapse without pressurised air, so they cannot become unseated from the rims. At a maximum of 80 km/h you can still travel up to 150 km.

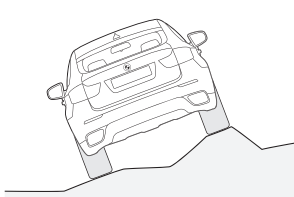

■ **Telescopic steering wheel with crash element** made of steel to improve driver protection in case of a collision. In a crash, the upper end of the steering column (spindle) is retracted by 80 mm given a certain impact force.

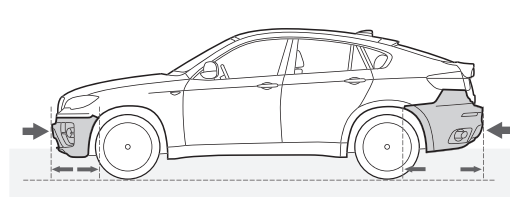

■ **The airbags** and all further safety components are perfectly coordinated in a BMW. This means that, in a collision, only the airbag actually required will be activated. Six airbags offer targeted protection: driver and front passenger airbags, head airbags as well as side airbags at the front.

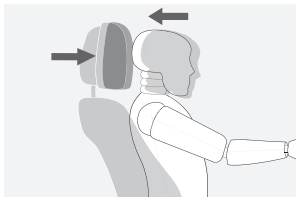

■ **Body rigidity:** the beam distribution and node connections of the vehicle's highly functional body structure, and the strategic use of high-rigidity materials, result in maximum passive safety in front, lateral or rear collisions. The rigid structure also makes an essential contribution to the rewardingly dynamic drive.

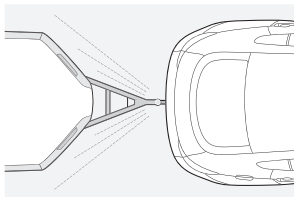

■ **The rollover sensor** is linked up to the Dynamic Stability Control (DSC) system for better and faster recognition of dangerous situations. Should an overturn occur, the airbags and belt tensioners are immediately triggered to ensure maximum passive safety.

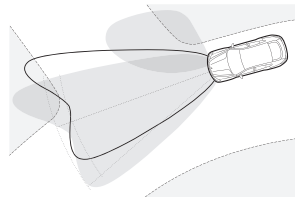

■ **Bumpers:** high-rigidity material in the bumper mounts mean that the body structure can absorb impacts at up to 15 km/h without damage.

■ **Active headrests in the front** move forward to reduce the distance from the occupant's head in the event of a collision, thus limiting the risk of possible injuries to the neck vertebrae.

□ **Trailer stability control** automatically recognises when a trailer being towed starts to sway and applies the brakes to stabilise it, lowering speed until the swaying stops (in conjunction with trailer tow hitch).

□ **Adaptive Headlights with variable light distribution and vertical adjustment, incl. turning lights** with moveable headlight units for optimum illumination of each upcoming bend as soon as the driver turns the steering wheel. The result is extra driving safety in the dark and in poor visibility. The turning lights are automatically activated even at a standstill, when the indicator is used or with a steering lock of over 10 degrees – up to 40 km/h.

¹ The figure quoted includes a 90% tank filling, 68 kg for the driver and 7 kg for luggage. Unladen weight applies to vehicles with standard specification. Optional equipment may increase this figure.

² BMW recommends the use of RON 95 super unleaded petrol. Unleaded RON 91 and higher with a maximum ethanol content of 10% (E10) may also be used. Output and consumption figures apply to RON 98 fuel.

³ System output 357 kW (485 hp), system torque 780 Nm.

⁴ Electronically limited.

⁵ With high-speed setup.

⁶ All engines comply with the EU5 emissions standard and the BMW X6 xDrive30d meets EU6 standard. Fuel consumption is determined in accordance with the ECE driving cycle made up of approximately one third urban and two thirds extra-urban driving (based on the distance covered). CO₂ emissions are measured in addition to fuel consumption. Fuel consumption is determined for vehicles with standard equipment.

Optional equipment (such as wider tyres) can have a significant impact on fuel consumption and on performance. Fuel consumption and CO₂ emissions dependent on selected wheel and tyre sizes.

⁷ Height with roof railing is 1,699 mm (ActiveHybrid X6: 1,706 mm).

⁸ In conjunction with increased towing capacity option.

Values in [] apply to vehicles with self-levelling pneumatic rear suspension or in combination with Adaptive Drive. The BMW X6 shown in this brochure has the exterior colour Nevada Vermilion Red metallic. The upholstery is Nevada leather Oyster, with interior fine-wood trim Bamboo Grain, dark. All dimensions in the technical drawings in millimetres. Height includes roof antenna. Luggage compartment capacity 570–1,450 litres (ActiveHybrid X6: 470–1,350). Values in () are for vehicles with a sliding roof.

EQUIPPED WITH THE BEST IDEAS. ORIGINAL BMW ACCESSORIES*.

Locking rear carrier rack **; 21" light-alloy wheels Star-spoke 128 chrome, cast.

Driving a BMW is always a special experience. Which can be enhanced even further with Original BMW Accessories. ** In conjunction with optional rear luggage carrier preparation.

BMW Individual

THE MOST EXCLUSIVE WAY TO DRIVE A BMW.

True exclusivity fulfils the highest demands: those which one places on oneself. BMW Individual enables you to turn these demands into reality, with a BMW Individual X6 in which every single detail is exactly crafted to harmonise with the whole. The BMW Individual paint finish in Pearl Silver metallic shown here owes its sophisticated iridescent effect to a special kind of pigmentation. The BMW Individual Merino leather in Slate creates a dramatic contrast to the exterior with its finely nuanced black.

Extended Merino leather trim in Slate with Alcantara piping, interior trim Piano Finish Black and instrument panel finished in Merino leather.

The extended Merino leather trim includes further leather-covered details such as the door trim inserts and the complete door handles. Another exclusive option is the BMW Individual instrument panel, also finished in Merino leather. The Piano Finish Black interior trim harmonises perfectly with the colour of the leather, and its high-gloss surface creates striking and elegant highlights. Let yourself be inspired by the BMW Individual range on the following pages. For an overview of BMW Individual colours and materials, please refer to pages 36–39.

BMW Individual Pearl Silver metallic paint finish.

BMW INDIVIDUAL. THE ART OF MOVING TO A HIGHER LEVEL.

BMW Individual offers exclusive equipment to take driving enjoyment to a new level. This includes unique colours and materials that are perfectly tailored to drivers' wishes. The exterior paint colours feature an intriguing iridescent effect. In the interior, top-quality leather and exclusive wood grains

BMW Individual exterior colours: a shade more brilliant. Several thousand shades, in fact.

BMW Individual paint finishes are unique. What sets them apart from standard exterior colours is their intriguing iridescence, creating a fascinating interplay of colours below the paint surface. The special pigments that create these effects lend the paint finish an extraordinary intensity.

BMW Individual leather: true exclusivity is a tangible phenomenon.

BMW Individual Merino leather does not just look enticingly soft and velvety; it also feels incredibly sumptuous. Its secret lies in our painstaking selection process: only absolutely flawless hides are approved for use. As a result, these premium leathers do not require any surface treatment. And by leaving the leather in its natural state, it retains its breathable, porous structure, remaining soft and supple. All leather colours are designed to match the BMW Individual paint finishes to perfection, so the car's interior will harmoniously complement the exterior.

Full Merino leather in Platinum with Figured Eucalyptus Red Brown interior trim and leather-covered dashboard.

create an unmistakable ambience. Innovative technologies ensure optimum comfort. The end result is a unique automobile.

BMW Individual interior trims: top-class craftsmanship for the finishing touch in the cabin.

BMW Individual wood trims have a magic all their own. They make our cars' interiors very special indeed, with exclusive grain characteristics and colours that are second to none. A strict selection process and perfect finishing ensure excellent quality. Superior craftsmanship is also an essential factor in creating our Piano Finish Black interior trim. Its brilliant, high-gloss surface is the result of a special process usually only applied by the world's leading piano makers.

BMW Individual High-End Audio System. For perfect listening enjoyment.

The BMW Individual High-End Audio System creates a listening experience on a par with a concert hall, using exceptionally powerful speakers with extremely stiff Hexacone membranes. Optimum positioning of the 16 High-End loudspeakers in the vehicle and unique signal processing thanks to the 9-channel amplifier with DIRAC Live technology further enhance sound quality, eliminating sound impurities and minimising sound reflections. Interior-specific equalizing and speed-dependent volume control ensure supreme HiFi enjoyment.

The BMW Service concept: always up to speed. When you buy a BMW, you can look forward to superb service and comprehensive customer care, with a worldwide network of more than 3,300 BMW Service partners in more than 150 countries ready to assist you at any time. The vehicle's on-board diagnostics keep you informed of when the car is next due for a check-up and what work needs to be done: **Condition-Based Service (CBS)** tracks service fluids and the condition of essential parts subject to wear. It also monitors the time- and mileage-linked service requirements of your BMW. Using these measurement data, the Info Display in the cockpit automatically alerts you in advance whenever

any part of the vehicle requires servicing. The iDrive Control Display contains exact information on which vehicle components will need to be serviced and when. In conjunction with BMW TeleServices*, the innovative telematics service provided by BMW Service, the CBS data are automatically transmitted to your BMW Service partner. This means that your service consultant has more time for you, and can provide more comprehensive advice. Your BMW Service partner will of course have **Original BMW Parts** available for any work to be done. In short: quality and safety are our top priorities.

TAILORED TO YOUR VEHICLE. BMW SERVICES.

BMW Service Inclusive*. Service costs are another area where your BMW Service partner can offer you an intelligent solution. With BMW Service Inclusive, routine maintenance service will be provided at no extra cost to you, for the agreed duration or mileage. Find out more online at www.bmw.com/serviceinclusive

With **BMW TeleServices***, you are always in safe hands. This feature enables your BMW to contact your BMW Service partner and register itself for a service appointment. As soon as the CBS sensors detect a service requirement, the vehicle will initiate an automatic BMW Teleservice call and transmit all service-related data – data which previously had to be collected in the workshop. Your service consultant will then call you back, in order to arrange an appointment. As vehicle information is transferred in advance, time in the garage can be spent more efficiently, so your BMW is back on the road faster. In the unlikely event of a breakdown, BMW TeleServices enables you to transmit diagnostics, vehicle and location data directly to BMW breakdown assistance. With BMW Teleservice Assistance, malfunctions can often be remedied remotely, getting you quickly and easily back on the road. For further information, visit www.bmw.com/teleservices

Mobile Service*: in the event of a breakdown, BMW Mobile Service is at your disposal round the clock. Specially trained BMW technicians will do everything necessary to get your BMW back on the road, with telephone or on-site assistance as needed. Simply contact BMW Mobile Service. In addition, all BMW vehicles newly registered from 1 January 2011, have a comprehensive 24-month mobility service in line with the applicable BMW Mobile Care warranty conditions (including towing, rental car, taxi, hotel accommodation and vehicle return). This BMW mobility warranty is automatically extended by another 24 months if you have the scheduled engine oil service performed by your authorised BMW Service partner – for up to 5 years after initial vehicle registration. More detailed information is available from your BMW Service partner or online at www.bmw.com/mobileservice

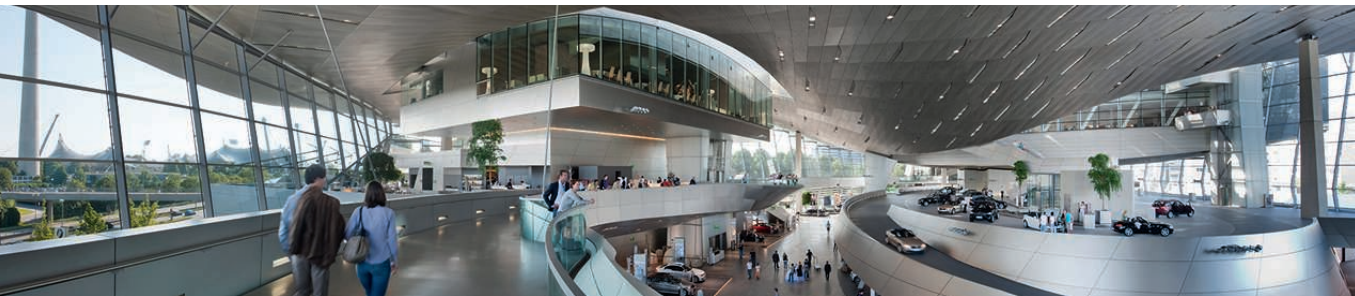

BMW Financial Services. If there's one more thing you could wish for to go with your BMW, it could simply be the perfect financing solution – one that leaves you with enough room for the other good things in life. BMW Financial Services provides you with personalised leasing, finance and insurance options – tailored to your requirements and budget. But we offer you more than just favourable conditions. Take for example the components of our leasing package, which include courtesy vehicles, hire purchase options for private customers, and insurance. For further information please consult our price list or visit www.bmwfs.com. Find out more – your BMW partner will be pleased to make you an individual offer for your desired car.

SHAPING THE FUTURE – RESPONSIBLY.

The BMW Group has been ranked the most sustainable automotive company worldwide in the Dow Jones Sustainability Index for the sixth time in a row. Sustainability is an integral part of our value chain, encompassing

EXPERIENCE MORE WITH BMW.

BMW Magazine: information and entertainment. Competent and comprehensive, the BMW Magazine brings you all the latest news from the world of BMW. You will receive two issues per year free of charge when you purchase a new BMW.

BMW Driving Experience: "Learn how to enhance your driving pleasure." Driving a BMW should be fun. And like any other piece of sport equipment, the better you are able to control it, the more fun it is. The BMW Driving Experience teaches you – on road and off, in snow and ice, or even in the Namibian desert – how far you can push your BMW, while still remaining perfectly safe. Topics range from BMW Safety and Snow and Ice to M Race Track Training on one of the toughest race tracks in the world – the Nürburgring. More information is available at www.bmw-drivingexperience.com

BMW Welt: joy has a home. Visit Munich, home to the BMW brand for over 90 years, and pick up your new BMW at BMW Welt. There you'll be able to experience BMW with all five senses and see your new BMW for the first time with your own eyes. BMW Welt offers you a tailor-made visitor programme. From relaxing in the Premium Lounge to a factory tour or a visit to the BMW Museum – there are plenty of unique experiences to perfectly complement the hand-over of your new car. It's more than worth it. Visit us online today at www.bmw-welt.com. Your local BMW partner can also provide you with further information. We look forward to seeing you.

BMW TV*: your source for all things BMW. This is where you can get to know the brand in all its facets, through comprehensive features, portraits, and background reports. www.bmw.tv/com provides you with up-to-date and entertaining information on automobiles, innovations, motor shows, events, sports, and lifestyle topics.

every stage from the development of fuel-saving and alternative vehicle concepts to environmentally-friendly production processes and recycling. Our research and development philosophy BMW EfficientDynamics delivers tangible benefits to customers, our climate and the environment. This is reflected in the reduction of CO₂ emissions by nearly 30 % across our European fleet of new cars between 1995 and today. We're also aiming to reduce the amount of resources such as water and energy consumed by our vehicle production by 30%

between 2006 and 2012. Your BMW is part of a comprehensive recycling concept. At the end of its long service life, every single vehicle can be easily and economically recycled. Please contact your BMW partner on all matters regarding the return of your end-of-life vehicle. For further information please visit our website.
